PROFESSIONAL SUMMARY

Frontend-focused Web Developer skilled in React.js and Next.js, with experience building interactive and performance-driven web applications. Currently working on chatbot systems using Python Flask and API integrations. Strong foundation in problem-solving and scalable web architecture.

TECHNICAL SKILLS

Languages:	C++, JavaScript, Python
Frontend:	React.js, Next.js, Tailwind CSS, HTML, CSS, Three.js, GSAP
Backend:	Flask, Node.js
Database:	MongoDB, MySQL, PostgreSQL
Tools:	Git, REST APIs, Postman, GitHub Copilot
Other:	Data Structures & Algorithms (LeetCode, CodeChef), Prompt Engineering

PROJECTS

app.bubbl.ooo - RAG Chatbot SaaS | Python Flask, Gemini API, Redis-Celery, PostgreSQL, JS, Paddle

- Engineered a multi-tenant RAG chatbot platform where scraped web content is auto-vectorized into Gemini FileSearch stores, enabling businesses to deploy context-aware AI agents with persistent conversations and lead capture - zero ML infra managed manually (similar to chatbase.co).
- Implemented background job processing with Celery + Redis for web scraping tasks.
- Deployed on VPS with Gunicorn (gthread) and systemd service management.

bhavishai.in - AI Astrology | Next.js, Swiss Ephemeris, Gemini AI, Razorpay, PostgreSQL

- Integrated Swiss Ephemeris (C-based library) to compute planetary longitudes and dashas from user details (DOB, POB), and used the Gemini API to produce specialized reports.
- Implemented a payment-to-delivery pipeline with Razorpay signature verification, background PDF generation, email dispatch, and an admin reconciliation system for failed deliveries.
- Built a protected admin panel with revenue dashboards, user journey analytics, and automated drip email sequences triggered by report completion status.

app.salesji.com - AI Telegram Bot Workspace | Telegram Bot API, AI Agents, Next.js, PostgreSQL

- Built a workspace for creating and managing AI-powered Telegram sales bots, letting businesses deploy conversational agents that engage leads and automate sales conversations directly inside Telegram.

makeperfectads.com - AI Video Ad Generator | AI Video, Web Scraping, TTS Voiceover, Multilingual

- Built an AI studio that turns a website link into an 8-20s video ad: reads the page, picks product images and brand colours, plans shots, and generates AI video with captions, voiceover and music in 84 languages (incl. Hinglish).

EDUCATION

B.Tech in Computer Science & Engineering
Rayat Bahra University, Mohali (Expected July 2026) | CGPA: 8.0

ADDITIONAL INFORMATION

- Currently interning at DrishInfoTech. Building production SaaS products independently.
